

## OUR PURPOSE

With 50 years of experience, SRS is ideally placed to deliver Ship Repair, Engineering Support and Maritime Solutions to the UK Owners, Ship Managers and Operators worldwide.

*Why:* We communicate, we advise, and we promote solutions & options to maritime operators on a global basis.

*How:* We have an in-depth knowledge of our partners' capabilities and expertise.

*Result:* We aim to maximise the operational efficiencies and revenue potential of the maritime asset.

All floating assets require maintenance. This is an ongoing challenge when legislation and compliance continue to evolve. SRS is committed to finding the maritime solution that addresses tomorrow's environment, whilst maximising the potential of each vessel.

## MARINE SERVICES

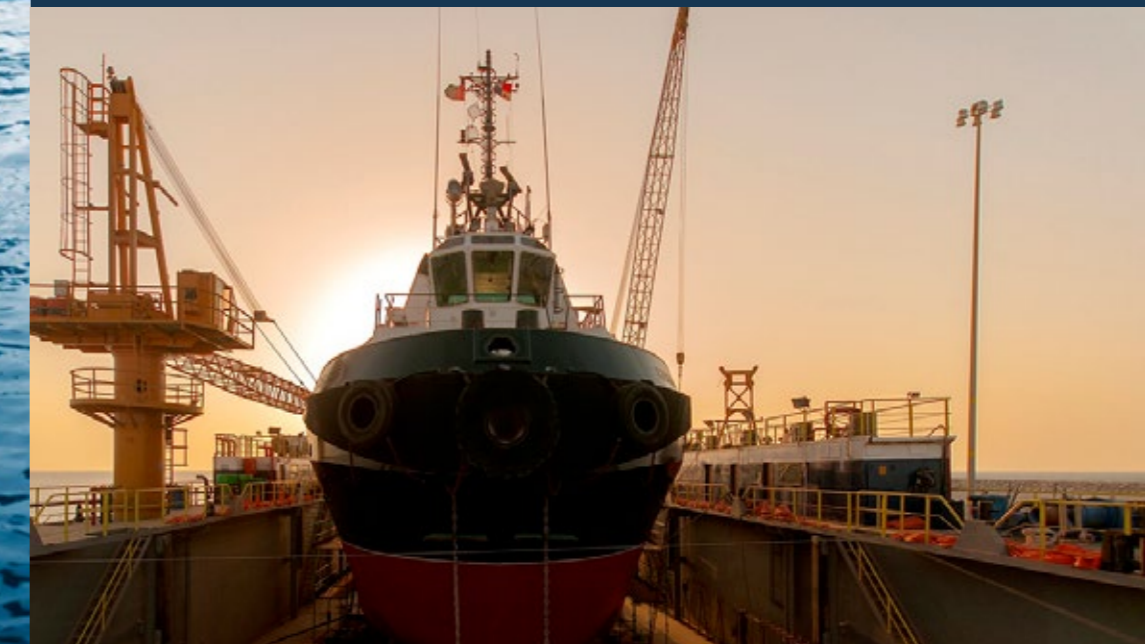

Through our service partners we can provide support and technical services to all floating assets including commercial vessels, defence vessels, offshore assets, specialist vessels and the private yacht market.

OUR PARTNERS INCLUDE:

- **LAGERSMIT**  
Lagersmit has been specialising in stern tube sealing solutions since 1856. SRS has joined forces with Lagersmit to provide VGP compliant, zero emission, modular made-to-measure solutions for new build and retrofit applications.
- **NICO INTERNATIONAL**  
SRS has partnered with NICO International, one of the Middle East's leading marine and industrial engineering companies. A one-stop shop for marine and underwater services in the UAE region.
- **EMCS**  
SRS is proud to collaborate with EMCS to offer skilled labour, riding teams, consultancy services / ship inspections, diving services and the Ship Superintendents' Training Course to all of our customers.
- **SPS TECHNOLOGY**  
SRS works with SPS Technology to provide clients with the Sandwich Plate System, a fast, non-disruptive and economic steel re-instatement and strengthening solution.

## NEW BUILDINGS

- **BARKMEIJER SHIPYARDS - THE NETHERLANDS**  
Over 165 years' experience building bulk carriers, dredgers, chemical, gas and bitumen tankers, fishing vessels and container ships which are customised to meet the specific requirements of clients.

Helping vessel owners to maximise their operational efficiencies & revenue potential
